• Git • GitHub • Bitbucket • VS Code • Shopify CLI • Postman • Figma • Jira • GCP • Amplience

Work Experience:

- ❖ **Techdenali LLC** 9/2021 - Present, On-Site
Shopify Developer
 - **Project: Albany Park**

A direct-to-consumer furniture brand offering modern modular sofas with a scalable Shopify storefront.
Role Description: Engineered high-performance UI components using Liquid, JavaScript, and SCSS. Implemented a custom React-based PDP solution to enable dynamic variant selection through real-time SAP ERP integration. Improved storefront performance using lazy loading and code splitting, enhancing page load speed and user experience.
 - **Project: X-Chair**

An eCommerce platform offering ergonomic office and gaming chairs with a focus on scalability and performance.
Role Description: Developed a modular Shopify theme leveraging Online Store 2.0 architecture with reusable sections and blocks. Implemented metafield-driven dynamic modals to enhance product presentation. Improved Core Web Vitals (LCP, CLS, FID) through frontend optimization and efficient asset handling.
 - **Project: Timbuk2**

A premium lifestyle brand specializing in bags and travel gear.
Role Description: Enhanced Shopify theme architecture with a focus on usability and performance. Implemented custom modal solutions using metafields to improve product engagement. Optimized PDP and collection pages and integrated third-party solutions to support scalability.
 - **Project: Mavix**

A high-performance ergonomic gaming chair brand.
Role Description: Optimized Shopify storefront with advanced frontend enhancements and custom PDP features. Implemented Vuex-based state management for real-time cart updates, improving data consistency and user interaction. Strengthened performance through efficient asset handling and frontend best practices.
 - **Project: Ulta Beauty**

A leading U.S. beauty retailer offering a wide range of cosmetics, skincare, haircare, and salon services in an inclusive, guest-focused environment.
Role Description: Contributed to backend and integration services for eCommerce platforms using Node.js and JavaScript. Developed APIs, resolved production issues, and supported CMS and third-party integrations.
